The Gestural Communication of Apes and Monkeys From Psychology Press

The Gestural Communication of Apes and Monkeys is an intriguing compilation of naturalistic and experimental research conducted over the course of 20 years on gestural communication in primates, as well as a comparison to what is known about the vocal communication of nonhuman primates. The editors also make systematic comparisons to the gestural communication of prelinguistic and just-linguistic human children. An enlightening exploration unfolds into what may represent the starting point for the evolution of human communication and language.

This especially significant read is organized into nine chapters that discuss:

- *the gestural repertoire of chimpanzees;
- *gestures in orangutans, subadult gorillas, and siamangs;
- *gestural communication in Barbary macaques; and
- *a comparison of the gestures of apes and monkeys.

This book will appeal to psychologists, anthropologists, and linguists interested in the evolutionary origins of language and/or gestures, as well as to all primatologists. A CD insert offers video of gestures for each of the species.

Editorial Review

Review

"This is an edited volume of excellent quality that will make an important contribution to research on primate gestures and the evolution of language. All chapters are very well written and well integrated in terms of both structure and content."

?Dario Maestripieri

The University of Chicago

About the Author

Josep Call is a comparative psychologist specialising in primate cognition at the Max Planck Institute for Evolutionary Anthropology. He is also the co-founder of the Wolfgang Kohler primate research centre and has an extensive back catalogue of works including 3 books and nearly 200 peer-reviewed articles.

Michael Tomasello is Codirector of the Max Planck Institute for Evolutionary Anthropology, Leipzig. He is the author of "The Cultural Origins of Human Cognition" and "Constructing a Language: A Usage-Based Theory of Language Acquisition."

Users Review

From reader reviews:

Isaias McGee:

The book The Gestural Communication of Apes and Monkeys can give more knowledge and also the precise product information about everything you want. Why then must we leave a very important thing like a book The Gestural Communication of Apes and Monkeys? A number of you have a different opinion about e-book. But one aim in which book can give many details for us. It is absolutely appropriate. Right now, try to closer along with your book. Knowledge or information that you take for that, you could give for each other; you may share all of these. Book The Gestural Communication of Apes and Monkeys has simple shape but you know: it has great and big function for you. You can look the enormous world by available and read a e-book. So it is very wonderful.

Sunny Weaver:

What do you about book? It is not important along? Or just adding material when you need something to explain what your own problem? How about your free time? Or are you busy person? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Everybody has many questions above. The doctor has to answer that question simply because just their can do that will. It said that about reserve. Book is familiar in each person. Yes, it is right. Because start from on pre-school until university need this The Gestural Communication of Apes and Monkeys to read.

Bruce Harrison:

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their down time with their family, or their own friends. Usually they carrying out activity like watching television, likely to beach, or picnic inside the park. They actually doing same task every week. Do you feel it?
