Linux Operations and Administration By Alfred Basta, Dustin A. Finamore, Nadine Basta, Serge Palladino

LINUX OPERATIONS AND ADMINISTRATION introduces readers to Linux operations and system administration through a unified installation, using virtual machines. This text is more effective than those that take a professional approach because it eliminates confusion from working with differing hardware configurations, while allowing users to test interoperability between Linux and Windows. Detailed, yet reader-friendly, Linux Operations and Administration makes it easy to learn Linux and practice it with helpful in-text features like learning objectives and key terms, as well as items for self assessment such as review questions, hands-on activities, and case projects.

Editorial Review

About the Author

Alfred Basta, PhD, is a professor of mathematics, cryptography, and information security as well as a professional speaker on topics in Internet security, networking, and cryptography. He is a member of many associations including the Mathematical Association of America. Dr. Basta's other publications include MATHEMATICS FOR INFORMATION TECHNOLOGY, LINUX OPERATIONS AND ADMINISTRATION, and DATABASE SECURITY.

Dustin A. Finamore has 14 years of experience with the United States Air Force (USAF), where he developed and taught UNIX security and UNIX advanced administration courses. As an airman, he installed, configured, and maintained intelligence computer systems worldwide. He is a graduate of Bellevue University and is currently an instructor at Virginia College, where he teaches Linux courses, among others.

Nadine Basta, MS, is a professor of computer science, information technology, and security. Her numerous certifications include MCSE, MSDBA, CCDP, NCSE, NCTE, and CCA. A security consultant and auditor, she combines strong "in the field" experience with her academic background. She is also coauthor of MATHEMATICS FOR INFORMATION TECHNOLOGY and LINUX OPERATIONS AND ADMINISTRATION.

Users Review

From reader reviews:

Yolanda Osuna:

As people who live in often the modest era should be update about what going on or info even knowledge to make them keep up with the era that is always change and progress. Some of you maybe will update themselves by reading through books. It is a good choice in your case but the problems coming to anyone is you don't know which you should start with. This Linux Operations and Administration is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and want in this era.

Gerald Chisholm:

In this time globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of recommendations to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher which print many kinds of book. The actual book that recommended for you is Linux Operations and Administration this reserve consist a lot of the information with the condition of this world now. This kind of book was represented just how can the world has grown up. The language styles that writer use to explain it is easy to understand. The actual writer made some study when he makes this book. That's why this book acceptable all of you.

Duane Sills:

In this particular era which is the greater person or who has ability to do something more are more special than other. Do you want to become considered one of it? It is just simple strategy to have that. What you must do is just spending your time not very much but quite enough to possess a look at some books. One of many books in the top listing in your reading list is Linux Operations and Administration. This book that is certainly qualified as The Hungry Slopes can get you closer in becoming precious person. By looking right up and review this book you can get many advantages.

Georgia Cunningham:

What is your hobby? Have you heard which question when you got pupils? We believe that that concern was given by teacher to the students. Many kinds of hobby, Every person has different hobby. And also you know that little person like reading or as reading through become their hobby. You need to know that reading is very important in addition to book as to be the matter. Book is important thing to provide you knowledge, except your current teacher or lecturer. You see good news or update about something by book. Many kinds of books that can you choose to adopt be your object. One of them is actually Linux Operations and Administration.
