Macroeconomics in Context By Neva Goodwin, Julie Nelson, Jonathan Harris, Brian Roach, James Devine

Designed for a single-semester undergraduate course, this introductory economics textbook updates traditional macroeconomics to encompass twenty-first century concerns. In contrast to standard texts, the book starts with the question of human well-being, and then examines how economic activities can contribute to or detract from it. "Macroeconomics in Context" covers standard macroeconomic concepts and models, and shows how they apply to such critical issues as ecological sustainability, distributional equity, the quality of employment, and the adequacy of living standards. In language that is clear and compelling, the book's discussions of historical, institutional, political, and social factors encourage students to engage with the subject matter. An Instructor's Resource Manual, a Test Bank, and a Student Study Guide are available online to instructors who adopt the text.
