Editorial Review

From the Author

This book is for the revised SAT beginning March 2016.

Quick tips for preparing for SAT math:

1. Begin studying at least 3 months before the SAT.
2. Practice SAT math problems for 20 minutes each day.
3. Choose a consistent study time and location for your SAT prep.
4. Every time you get an SAT question wrong, mark it off.
5. Redo SAT math problems you have marked off every few days.
6. If you get a problem wrong again, keep it marked off.
7. Try to solve each problem in more than one way.
8. Learn test taking strategies that work specifically for standardized tests.
9. Focus on SAT math problems at and slightly above your current level.
10. Take four official SAT practice tests before test day.

From the Back Cover

Put your first-choice college well within your reach with New SAT Math Problems Arranged by Topic and Difficulty Level. The problems in this book were carefully chosen by a Ph.D. in mathematics with more than a decade of SAT math tutoring experience. This book is laid out in such a way that any student can immediately find the problems he or she needs to improve in a quick and efficient manner.

Using this book you will learn to solve SAT math problems in clever and efficient ways that will have you spending less time on each problem, and answering difficult questions with ease. You will feel confident that you are applying a trusted system to one of the most important tests you will ever take.

Inside this book you will find important advice that will significantly increase your SAT math score before you even do a single problem. The main part of the book consists of math problems arranged by topic and difficulty level, many with multiple solutions; the quickest way to solve each of these problems is included - a feature ideal for those students going for a perfect 800 or near perfect score!

Here's to your success on the SAT, in college, and in life.
