STATISTICAL INFERENCE : THEORY OF ESTIMATION By **MANOJ KUMAR SRIVASTAVA, ABDUL HAMID KHAN, NAMITA SRIVASTAVA**

This book is sequel to a book *Statistical Inference: Testing of Hypotheses* (published by PHI Learning). Intended for the postgraduate students of statistics, it introduces the problem of estimation in the light of foundations laid down by Sir R.A. Fisher (1922) and follows both classical and Bayesian approaches to solve these problems.

The book starts with discussing the growing levels of data summarization to reach maximal summarization and connects it with sufficient and minimal sufficient statistics. The book gives a complete account of theorems and results on uniformly minimum variance unbiased estimators (UMVUE)—including famous Rao and Blackwell theorem to suggest an improved estimator based on a sufficient statistic and Lehmann-Scheffe theorem to give an UMVUE. It discusses Cramer-Rao and Bhattacharyya variance lower bounds for regular models, by introducing Fisher's information and Chapman, Robbins and Kiefer variance lower bounds for Pitman models. Besides, the book introduces different methods of estimation including famous method of maximum likelihood and discusses large sample properties such as consistency, consistent asymptotic normality (CAN) and best asymptotic normality (BAN) of different estimators.

Separate chapters are devoted for finding Pitman estimator, among equivariant estimators, for location and scale models, by exploiting symmetry structure, present in the model, and Bayes, Empirical Bayes, Hierarchical Bayes estimators in different statistical models. Systematic exposition of the theory and results in different statistical situations and models, is one of the several attractions of the presentation. Each chapter is concluded with several solved examples, in a number of statistical models, augmented with exposition of theorems and results.

KEY FEATURES

- Provides clarifications for a number of steps in the proof of theorems and related results.,
- Includes numerous solved examples to improve analytical insight on the subject

by illustrating the application of theorems and results.

- Incorporates Chapter-end exercises to review student's comprehension of the subject.
- Discusses detailed theory on data summarization, unbiased estimation with large sample properties, Bayes and Minimax estimation, separately, in different chapters.

Editorial Review

About the Author

Manoj Kumar Srivastava, Ph.D., is Associate Professor, Department of Statistics, Institute of Social Sciences, Dr. B.R. Ambedkar University (formerly Agra University), Agra. With a teaching experience of nearly two decades, Dr. Srivastava has published/presented several research publications in reputed national and international journals/conferences. He is a member of Indian Society of Agricultural Statistics, New Delhi; Assam Statistical Review, Dibrugarh University, Assam; Calcutta Statistical Association; Indian Bayesian Society, Indian Chapter of International Society for Bayesian Analysis (ISBA) and Advances and Application in Statistics, Allahabad University, India. Abdul Hamid Khan, Ph.D., is former Dean, Faculty of Science and Chairman, Department of Statistics and Operations Research, Aligarh Muslim University (AMU), Aligarh. Dr. Khan has a teaching experience of more than 40 years at AMU. Earlier he has served at Al Fateh University, Libya, Al Yarmouk University, Jordan as Associate Professor and King Saud University, Riyadh, Kingdom of Saudi Arabia as Professor of Statistics. Dr. Khan has published more than 75 papers in reputed journals. An active member of many Statistical Societies in India and abroad, he is also associated with Universities/Colleges/PSC/UPSC etc. in different capacities. Namita Srivastava, Ph.D., is Associate Professor, Department of Statistics, St. John's College, Agra. With a teaching experience of nearly two decades, Dr. Srivastava has presented many research papers in conferences/seminars. She is a member of a number of professional organizations like Indian Society of Agricultural Statistics, New Delhi, Assam Statistical Review, Dibrugarh University, Assam, Calcutta Statistical Association, Indian Bayesian Society, Indian Chapter of International Society for Bayesian Analysis (ISBA).

Users Review

From reader reviews:

Eric Campbell:

Have you spare time to get a day? What do you do when you have far more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a go walking, shopping, or went to often the Mall. How about open or maybe read a book allowed STATISTICAL INFERENCE : THEORY OF ESTIMATION? Maybe it is to become best activity for you. You know beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have other opinion?

Ronda Caesar:

This STATISTICAL INFERENCE : THEORY OF ESTIMATION is great book for you because the content that is full of information for you who all always deal with world and also have to make decision every minute. That book reveal it facts accurately using great plan word or we can state no rambling sentences inside it. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only offers you straight forward sentences but challenging core information with beautiful delivering sentences. Having STATISTICAL INFERENCE : THEORY OF ESTIMATION in your hand like having the world in your arm, facts in it is not ridiculous 1. We can say that no reserve that offer you world in ten or fifteen moment right but this guide already do that. So , this really is good reading book. Hello Mr. and Mrs. active do you

still doubt that will?

Jack Lumpkin:

The book untitled STATISTICAL INFERENCE : THEORY OF ESTIMATION contain a lot of information on that. The writer explains your girlfriend idea with easy technique. The language is very clear and understandable all the people, so do certainly not worry, you can easy to read it. The book was written by famous author. The author provides you in the new time of literary works. You can actually read this book because you can please read on your smart phone, or product, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can available their official web-site and also order it. Have a nice learn.

Jeri McKeen:

It is possible to spend your free time you just read this book this guide. This STATISTICAL INFERENCE : THEORY OF ESTIMATION is simple to create you can read it in the playground, in the beach, train and soon. If you did not possess much space to bring often the printed book, you can buy the e-book. It is make you simpler to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.
