Test Pilot: 1,001 Things You Thought You Knew About Aviation (General Aviation Reading series) By Barry Schiff

Organized into eight chapters, the book presents fun facts on the following subjects: History, Piloting, Navigation, Weather, Aircraft, Airlines and Military, Facts of Flight, Procedures and Regulations. Through multiple choice, true/false, fill-in-the-blank, mix-and-match, and essay questions, the reader is challenged to derive the answer before finding it at the end of the chapter.

A true aviation buff, the author teaches new information, clarifies points commonly misunderstood, and provides a wealth of knowledge on the aviation industry. Illustrated throughout with unique and entertaining photographs from Barry Schiff's own collection.

Pilots are accustomed to test-taking — it's part of earning and maintaining all pilot certificates. But this collection of infrequently-asked questions puts the fun back into self-quizzing, encouraging you to stretch your knowledge base and go beyond the subjects learned during student pilot days. Some of Schiff's questions are for pure entertainment. Some take you right to the airport:

"Q: A pilot is taxiing along a narrow taxiway at an uncontrolled airport on a cloudless day when he notices another 172 approaching from the opposite direction. Without stopping, how can both pilots be certain that their wingtips will not touch as they pass one another?"

Some questions share tips from a pro; other material will spark lively discussions for hangar flying.
