Did a race of giant humans once roam the Biblical lands, Europe and North America? Over 300 historical accounts of giant human skeletons are presented for the first time. Massive human skeletal remains, burial mound types, symbolism, etymology, numerology and ceremonial centers are compared in the Biblical Levant, the British Isles and the Ohio Valley with stunning similarities.

Genesis 6:4, "There were giants in the earth in those days; and also after that, when the sons of God came unto the daughters of men, and they bare children to them, the same became mighty men which were of old men of renown." The giant offspring of this union between the sons of God and the daughters of men were called the Nephilim. This book takes the leap from mythology to science to discover that the Nephilim were the last vestiges of primitive species; who were known for their gigantic height. The Nephlim spread from the Biblical Lands to the British Isles and the Ohio Valley. Their open-air earthen and stone temples and burial mounds, containing the remains of giants have stood the testament of time; leaving an indelible mark upon our soil. Herein are the historical accounts of the giant skeletons that have been discovered within burial mounds and subsurface tombs in the Biblical Lands, the British Isles and Europe and North America.

From the Back Cover

Genesis 6:4 "There were giants in the earth in those days; and also after that, when the sons of God came in unto the daughters of men, and they bare children to them, the same became mighty men which were of old men of renown." The giant offspring of this union between the sons of God and the daughters of men were called the Nephilim. This book takes the leap from mythology to science to discover that the Nephilim were the last vestiges of the Cro-Magnon species; who were known for their great height. Herein are the historical accounts of over 300 giant skeletons that have been discovered within burial mounds and sub surface tombs in the Levant, the British Isles and the Ohio Valley. Many of these skeletons were measured 8 or 9 feet in height. Alternative theories are given for the peopling of North America that include the Cro-Magnon Maritime Archaic Hunters and Fishers who had circumnavigated the globe. Leaving their large skeletons and identical artifacts across the northern latitudes. This migration was followed by the accounted giants in the Bible, called the Amorites, whose burial mounds containing large skeletons and sun temples, known as henges are found in the British Isles and in the Ohio Valley. Revealed for the first time is a numerical codex called *gematria* that was used by the Babylonians, the Amorites and used within the Bible itself. This codex is found within the measurements of Stonehenge and the earthworks in the Ohio Valley. The lengths, diameters and circumferences of the circular and square works are examined, unveiling the mound builders in the Ohio Valley had knowledge of complex mathematics that included how to formulate pi and square roots.
