Understanding Dying, Death, and Bereavement By Michael R. Leming, George E. Dickinson

Using a social-psychological approach, the new edition of this book remains solidly grounded in theory and research, while also providing useful information to help individuals examine their own feelings about-and cope with-death and grieving. The well-known authors and researchers integrate stimulating personal accounts throughout the text, and apply concepts to specific examples that deal with cross cultural perspectives and the practical matters of death and dying.

Editorial Review

Review

"This book does an excellent job of integrating and presenting empirical research on death-related topics. I would say that this book takes a multidisciplinary approach to the study of death and dying, presenting a comprehensive review of key topics and issues in the field. The authors manage to cover the personal, social, cultural, legal, philosophical, spiritual, and ethical issues related to death and dying against the backdrop of empirical research and theory in the field. In addition to presenting basic facts and information, the authors offer practical advice that enables readers to understand and to cope with the problems and issues that arise in a world where death, dying, and bereavement are a reality."

"I have used this book several times and have not found one that is as comprehensive or offers the cross-cultural insights. I selected it because not only was it substantive, but it also introduced students to cross-cultural variations. Further, it went beyond the psychological issues of dying and bereavement, [and] provided a context for the ways in which people die and mourn and the consequences of dying, death, and loss to others."
