Surveying for Engineers By J. Uren, W.F. Price

The fifth edition of *Surveying for Engineers* sets out the essential techniques needed for a solid grounding in the subject.

Covering traditional methods and the latest technological advances this popular and trusted textbook is packed with clear illustrations, exercises and worked examples, making it both a comprehensive study aid for students and a reliable reference tool for practitioners.

Aimed at students studying surveying as either part of an engineering, building or construction course or as a separate discipline, the new edition includes:

- the latest developments in Global Navigation Satellite Systems (GNSS)
- full details on the introduction of network RTK systems and their applications
- recent developments in survey instruments, methods and technologies
