Advanced Methods of Solid Oxide Fuel Cell Modeling (Green Energy and Technology) By Jaroslaw Milewski, Konrad Swirski, Massimo Santarelli, Pierluigi Leone

Fuel cells are widely regarded as the future of the power and transportation industries. Intensive research in this area now requires new methods of fuel cell operation modeling and cell design. Typical mathematical models are based on the physical process description of fuel cells and require a detailed knowledge of the microscopic properties that govern both chemical and electrochemical reactions. *Advanced Methods of Solid Oxide Fuel Cell Modeling* proposes the alternative methodology of generalized artificial neural networks (ANN) solid oxide fuel cell (SOFC) modeling.

Advanced Methods of Solid Oxide Fuel Cell Modeling provides a comprehensive description of modern fuel cell theory and a guide to the mathematical modeling of SOFCs, with particular emphasis on the use of ANNs. Up to now, most of the equations involved in SOFC models have required the addition of numerous factors that are difficult to determine. The artificial neural network (ANN) can be applied to simulate an object's behavior without an algorithmic solution, merely by utilizing available experimental data.

The ANN methodology discussed in *Advanced Methods of Solid Oxide Fuel Cell Modeling* can be used by both researchers and professionals to optimize SOFC design. Readers will have access to detailed material on universal fuel cell modeling and design process optimization, and will also be able to discover comprehensive information on fuel cells and artificial intelligence theory.

Editorial Review

From the Back Cover

Fuel cells are widely regarded as the future of the power and transportation industries. Intensive research in this area now requires new methods of fuel cell operation modeling and cell design. Typical mathematical models are based on the physical process description of fuel cells and require a detailed knowledge of the microscopic properties that govern both chemical and electrochemical reactions. *Advanced Methods of Solid Oxide Fuel Cell Modeling* proposes the alternative methodology of generalized artificial neural networks (ANN) solid oxide fuel cell (SOFC) modeling.

Advanced Methods of Solid Oxide Fuel Cell Modeling provides a comprehensive description of modern fuel cell theory and a guide to the mathematical modeling of SOFCs, with particular emphasis on the use of ANNs. Up to now, most of the equations involved in SOFC models have required the addition of numerous factors that are difficult to determine. The artificial neural network (ANN) can be applied to simulate an object's behavior without an algorithmic solution, merely by utilizing available experimental data.

The ANN methodology discussed in *Advanced Methods of Solid Oxide Fuel Cell Modeling* can be used by both researchers and professionals to optimize SOFC design. Readers will have access to detailed material on universal fuel cell modeling and design process optimization, and will also be able to discover comprehensive information on fuel cells and artificial intelligence theory.

About the Author

Jaros?aw Milewski is a doctor of engineering and an associate professor in the Power Division of the Institute of Heat Engineering, Faculty of Power and Aeronautical Engineering at Warsaw University of Technology. He has research experience in fuel cell modeling (especially solid oxide fuel cell hybrid systems and molten carbonate fuel cell hybrid systems) and advanced power systems, as well as classic power generation systems.

Konrad ?wirski is a doctor of engineering and an associate professor in the Power Division of the Institute of Heat Engineering, Faculty of Power and Aeronautical Engineering at Warsaw University of Technology. His research focuses on artificial intelligence (especially bio-inspired solutions like artificial neural networks, genetics algorithms, and artificial immunological control systems) and its application in power systems modeling, control and optimization.

Pierluigi Leone is a doctor of engineering and an assistant professor in applied physics at the Department of Energy of Politecnico of Turin. His research focuses on the engineering and testing of advanced energy systems based on high temperature fuel cells; in particular on the characterization of the electrochemical and mechanical properties of advanced single SOFCs, on the engineering of a planar SOFC micro-CHP unit and on the assessment of the in-operation homogeneity of large SOFC systems.

Massimo Santarelli is a doctor of engineering and an associate professor in thermodynamics and heat transfer, Department of Energy, Politecnico di Torino. His research focuses on fuel cells and hydrogen, and their integration with renewable sources: experimental activity and modeling of SOFC generators and the balance of plants; experimental activity and modeling of PEMFC and DMFC single cells and stacks;

experimental activity and modeling of high pressure electrolysis fed by renewable sources; modelling, analysis and optimization of energy systems based on integration of RES and H₂.

Users Review

From reader reviews:

Scott Halpin:

The book untitled Advanced Methods of Solid Oxide Fuel Cell Modeling (Green Energy and Technology) contain a lot of information on that. The writer explains her idea with easy approach. The language is very easy to understand all the people, so do not really worry, you can easy to read this. The book was compiled by famous author. The author brings you in the new period of time of literary works. You can read this book because you can read on your smart phone, or gadget, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and also order it. Have a nice study.

Denise Zimmerman:

In this era which is the greater particular person or who has ability to do something more are more precious than other. Do you want to become one of it? It is just simple method to have that. What you must do is just spending your time little but quite enough to get a look at some books. One of many books in the top record in your reading list is Advanced Methods of Solid Oxide Fuel Cell Modeling (Green Energy and Technology). This book that is qualified as The Hungry Mountains can get you closer in getting precious person. By looking right up and review this book you can get many advantages.

Rigoberto Adams:

What is your hobby? Have you heard this question when you got college students? We believe that that issue was given by teacher with their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person like reading or as studying become their hobby. You should know that reading is very important and also book as to be the issue. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You find good news or update regarding something by book. Different categories of books that can you choose to adopt be your object. One of them is actually Advanced Methods of Solid Oxide Fuel Cell Modeling (Green Energy and Technology).

Richard Harden:

Many people said that they feel bored when they reading a e-book. They are directly felt the item when they get a half portions of the book. You can choose often the book Advanced Methods of Solid Oxide Fuel Cell Modeling (Green Energy and Technology) to make your own personal reading is interesting. Your skill of reading proficiency is developing when you just like reading. Try to choose basic book to make you enjoy to study it and mingle the impression about book and reading through especially. It is to be initially opinion for you to like to available a book and study it. Beside that the e-book Advanced Methods of Solid Oxide Fuel

Cell Modeling (Green Energy and Technology) can to be your new friend when you're feel alone and confuse in what must you're doing of this time.
