Geometry of Conics (Mathematical World) By A. V. Akopyan, A. A. Zaslavsky

The book is devoted to the properties of conics (plane curves of second degree) that can be formulated and proved using only elementary geometry. Starting with the well-known optical properties of conics, the authors move to less trivial results, both classical and contemporary. In particular, the chapter on projective properties of conics contains a detailed analysis of the polar correspondence, pencils of conics, and the Poncelet theorem. In the chapter on metric properties of conics the authors discuss, in particular, inscribed conics, normals to conics, and the Poncelet theorem for confocal ellipses. The book demonstrates the advantage of purely geometric methods of studying conics. It contains over 50 exercises and problems aimed at advancing geometric intuition of the reader. The book also contains more than 100 carefully prepared figures, which will help the reader to better understand the material presented

Editorial Review

Review

"The book is well written and contains a lot of figures illustrating the theorems and their proofs." ---- MAA Reviews

Users Review

From reader reviews:

Vance Malik:

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite publication and reading a guide. Beside you can solve your problem; you can add your knowledge by the reserve entitled Geometry of Conics (Mathematical World). Try to the actual book Geometry of Conics (Mathematical World) as your friend. It means that it can to become your friend when you experience alone and beside that course make you smarter than in the past. Yeah, it is very fortunated for you. The book makes you far more confidence because you can know anything by the book. So , let me make new experience and also knowledge with this book.

Bethany Hall:

Book is to be different per grade. Book for children until eventually adult are different content. As it is known to us that book is very important for us. The book Geometry of Conics (Mathematical World) seemed to be making you to know about other information and of course you can take more information. It is very advantages for you. The reserve Geometry of Conics (Mathematical World) is not only giving you considerably more new information but also to become your friend when you experience bored. You can spend your own spend time to read your guide. Try to make relationship with the book Geometry of Conics (Mathematical World). You never sense lose out for everything should you read some books.

Shalon Dougherty:

Spent a free time and energy to be fun activity to try and do! A lot of people spent their down time with their family, or their friends. Usually they performing activity like watching television, planning to beach, or picnic in the park. They actually doing same task every week. Do you feel it? Do you need to something different to fill your own personal free time/ holiday? Could possibly be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the e-book untitled Geometry of Conics (Mathematical World) can be great book to read. May be it is usually best activity to you.

Robert Denney:

Reading a book for being new life style in this calendar year; every people loves to learn a book. When you learn a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what types of book that you have read. If you wish to get information about your study, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such us novel, comics, and also soon. The Geometry of Conics (Mathematical World) provide you with new experience in studying a book.
