Marine Structures Engineering: Specialized Applications By Gregory Tsinker

Marine Structures Engineering is designed to help engineers meet the growing worldwide demand for construction of new ports and the modernization of existing ports and terminals. It provides an authoritative guide to the design, construction, rehabilitation, repair, and maintenance of port and harbor structures. Each chapter is self-contained, allowing readers to access specific information. The Author draws on his extensive experience in offshore structure and port engineering to demonstrate evaluation, rehabilitation, repair, and maintenance of in-service marine structures. Also covered in detail are state-of-the-art approaches to: *marine structures in cold regions, with special attention to the role of ice loads, permafrost, and other ice effects *shiplifts, marine railways, shipways, and dry docks *offshore moorings *floating breakwaters *marinas *structures that protect bridge piers from ship impact. Offering practical information on all aspects of marine structures, this book serves as an indispensable resource to all engineers and professionals involved in design, construction, maintenance, and modernization of ports and harbors.

Editorial Review

Review

This book is not just an overview but provides realistic calculations enabling one to not only understand the forces involved, but to design structures to tolerate such forces. It is an easy-to-read book and could be invaluable to the non-specialist engineer as well as marine engineers working in port and terminal environments. It is a book that can be confidently recommended. - Environmental Engineering

Users Review

From reader reviews:

Glady Curry:

In this 21st millennium, people become competitive in every way. By being competitive at this point, people have to do something to make themselves survive, being in the middle of the actual crowded place and notice through surrounding. One thing that often many people have underestimated this for a while is reading. Yes, by reading a book your ability to survive raises then having a chance to remain than other is high. For you who want to start reading a book, we give you this particular Marine Structures Engineering: Specialized Applications book as nice and daily reading book. Why, because this book is more than just a book.

Irma Chavez:

The particular book Marine Structures Engineering: Specialized Applications will bring you to definitely the new experience of reading a book. The author's style to explain the idea is very unique. Should you try to find a new book to see, this book is very acceptable to you. The book Marine Structures Engineering: Specialized Applications is much recommended to you to read. You can also get the e-book from the official web site, so you can quicker to read the book.

Rita Merritt:

Are you kind of an active person, only have 10 or 15 minutes in your day time to upgrading your mind proficiency or thinking skill actually analytical thinking? Then you have a problem with the book when compared with can satisfy your short time to read it because this all time you only find a guide that needs more time to be gone through. Marine Structures Engineering: Specialized Applications can be your answer because it can be read by you who have those short free time problems.

Warner Gomez:

In this time of globalization it is important to someone to acquire information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information

quicker to share. You can find a lot of referrals to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher this print many kinds of book. Typically the book that recommended to you is Marine Structures Engineering: Specialized Applications this book consist a lot of the information with the condition of this world now. This specific book was represented so why is the world has grown up. The language styles that writer require to explain it is easy to understand. The writer made some study when he makes this book. Here is why this book suitable all of you.
