Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry) From Wiley-VCH

In this comprehensive two-volume resource on the topic senior lead generation medicinal chemists present a coherent view of the current methods and strategies in industrial and academic lead generation. This is the first book to combine both standard and innovative approaches in comparable breadth and depth, including several recent successful lead generation case studies published here for the first time.

Beginning with a general discussion of the underlying principles and strategies, individual lead generation approaches are described in detail, highlighting their strengths and weaknesses, along with all relevant bordering disciplines like e.g. target identification and validation, predictive methods, molecular recognition or lead quality matrices. Novel lead generation approaches for challenging targets like DNA-encoded library screening or chemical biology approaches are treated here side by side with established methods as high throughput and affinity screening, knowledge- or fragment-based lead generation, and collaborative approaches. Within the entire book, a very strong focus is given to highlight the application of the presented methods, so that the reader will be able to learn from real life examples. The final part of the book presents several lead generation case studies taken from different therapeutic fields, including diabetes, cardiovascular and respiratory diseases, neuroscience, infection and tropical diseases.

The result is a prime knowledge resource for medicinal chemists and for every scientist involved in lead generation.

Editorial Review

About the Author

Joerg Holenz is a trained organic and medicinal chemist and acquired his PhD in Germany on the synthesis of alkaloids as antimalarial agents. After leading the preclinical activities of the marketed analgesic Tapentadol (Grünenthal Pharmaceuticals GmbH), he headed the medicinal chemistry department of Barcelona-based Laboratorios Esteve. He then moved to AstraZeneca's CNS/ pain research unit in Sweden to head lead generation chemistry. In 2012, Joerg was selected to join AZ's newly formed 'virtual' neuroscience unit in Boston as director of discovery and preclinical sciences. As a project leader he is responsible for pioneering a novel concept of driving research and development projects via increased use of academic and industry collaborative networks. In his career, Joerg worked predominantly with peripheral and central targets in the pain and neuroscience disease areas. He has edited, authored or contributed to more than 45 publications, 50 patent applications and several books and book chapters.

Users Review

From reader reviews:

Ben Hernandez:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a wander, shopping, or went to the particular Mall. How about open or read a book entitled Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry)? Maybe it is for being best activity for you. You already know beside you can spend your time using your favorite's book, you can better than before. Do you agree with their opinion or you have other opinion?

Carolyn Treece:

What do you ponder on book? It is just for students since they're still students or this for all people in the world, what best subject for that? Just you can be answered for that concern above. Every person has distinct personality and hobby for every other. Don't to be compelled someone or something that they don't wish do that. You must know how great in addition to important the book Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry). All type of book is it possible to see on many sources. You can look for the internet options or other social media.

Bryon Diaz:

Book is to be different for each and every grade. Book for children till adult are different content. As you may know that book is very important for all of us. The book Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry) was making you to know about other information and of course you can take more information. It is very advantages for you. The publication Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry) is not only giving you far more

new information but also for being your friend when you truly feel bored. You can spend your own spend time to read your e-book. Try to make relationship together with the book *Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry)*. You never experience lose out for everything when you read some books.

Ester Beckles:

People live in this new day time of lifestyle always try and and must have the spare time or they will get lot of stress from both way of life and work. So , when we ask do people have free time, we will say absolutely sure. People is human not only a robot. Then we ask again, what kind of activity do you have when the spare time coming to anyone of course your answer can unlimited right. Then ever try this one, reading guides. It can be your alternative throughout spending your spare time, the particular book you have read is actually *Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry)*.
