Editorial Review

From the Back Cover

This book about ECG tracings and Holter recordings presented by Drs. Jan and Richard Adamec and Dr. Hein Wellens comprises quite an amazing collection. Each tracing is different from the others and sometimes presents unexplained arrhythmias at first glance. To fully understand these examples, one must understand their peculiarities. Nevertheless, each enigma has a solution, and each case is solved. Comprehension of the different arrhythmias includes their therapeutic consequences; sometimes the best therapeutic option is to do nothing. In studying these cases, it is essential to look very carefully and to understand the pattern of events?first to identify the mechanism, then to determine the clinical importance, and finally to decide whether the case is severe or benign. The classic ECG books, although very comprehensive, do not address this subject the same way. The examples presented in this book are from real-life cases from the practice of Drs. Jan and Richard Adamec and could not be explained adequately in a textbook. These real-life ECG tracings are very helpful because as cardiologists, our goal is to find an explanation for any pathologic tracing. The importance of this book, therefore, lies in its presentation and content, which is composed entirely of tracings from a practice in the Lake Geneva area. These tracings will certainly be of interest to doctors worldwide.

About the Author

Dr. Richard Adamec received his medical doctor (MD) degree in 1957 from Charles University in Prague. In 1988, he became a privatdocent. From 1975 to 1979, he was Senior Registrar at the Cardiology Centre of the University Hospital of Geneva. From 1979 to 1998, he served as Staff Cardiologist at both the Geneva Medical University Policlinic and the Cardiology Centre of the University Hospital of Geneva. Between 1975 and 1998, he was responsible for interpreting all Holter ECG recordings performed at both those institutions.

Dr. Jan Adamec received his Swiss Medical Federal diploma in 1988 and his doctorate in medicine (MD) from Geneva University in 1994. Since 1996, he has served as an FMH Specialist in Cardiology and Internal Medicine. Since 1997, he has been a Consultant Cardiologist at the Cardiology Centre (University Hospital of Geneva); an Associate Cardiologist at the Cecil Clinic Hirslanden, Lausanne; and Deputy Head Physician at the Clinic La Prairie, Montreux, Switzerland.

Dr. Hein Wellens, considered the founding father of clinical arrhythmology, studied medicine at the University of Leiden. From 1973 to 1977, he was Professor of Cardiology at the University of Amsterdam. From 1977 to 2001, he served as Professor of Cardiology and Chairman of the Department of Cardiology at the Academic Hospital of Maastricht University, creating a school of arrhythmology that educated more than 130 cardiologists from around the world during his tenure. Dr. Wellens also directed the Interuniversity Cardiological Institute of the Netherlands (ICIN) from 1993 to 2003 and was Associate Editor of *Circulation* from 1993 to 2004. He has authored or coauthored more than 600 peer-reviewed articles, 240 book chapters, and 20 cardiology books.

Users Review

From reader reviews:

Louise Hawkins:

Information is provisions for folks to get better life, information these days can get by anyone on everywhere. The information can be a understanding or any news even restricted. What people must be consider whenever those information which is in the former life are difficult to be find than now could be taking seriously which one would work to believe or which one the resource are convinced. If you get the unstable resource then you have it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Practical ECG Holter: 100 Cases as your daily resource information.

Shirley Raine:

Are you kind of busy person, only have 10 as well as 15 minute in your time to upgrading your mind ability or thinking skill possibly analytical thinking? Then you are receiving problem with the book compared to can satisfy your short period of time to read it because all this time you only find publication that need more time to be examine. Practical ECG Holter: 100 Cases can be your answer as it can be read by an individual who have those short time problems.

Fernando Minaya:

Reading a book to be new life style in this season; every people loves to read a book. When you study a book you can get a large amount of benefit. When you read ebooks, you can improve your knowledge, due to the fact book has a lot of information upon it. The information that you will get depend on what types of book that you have read. If you would like get information about your study, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, as well as soon. The Practical ECG Holter: 100 Cases will give you a new experience in examining a book.

Neil Dussault:

That book can make you to feel relax. This book Practical ECG Holter: 100 Cases was multi-colored and of course has pictures on the website. As we know that book Practical ECG Holter: 100 Cases has many kinds or genre. Start from kids until teenagers. For example Naruto or Detective Conan you can read and think you are the character on there. Therefore not at all of book are generally make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for you personally and try to like reading that.
