## Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences) By David W. Kaplan

Using detailed, empirical examples, **Structural Equation Modeling, Second Edition**, presents a thorough and sophisticated treatment of the foundations of structural equation modeling (SEM). It also demonstrates how SEM can provide a unique lens on the problems social and behavioral scientists face.

### Intended Audience

While the book assumes some knowledge and background in statistics, it guides readers through the foundations and critical assumptions of SEM in an easy-to-understand manner.

## **Editorial Review**

### Review

"This is a thorough and sophisticated treatment of structural equation modeling (SEM). . . . The author clearly is knowledgeable and has put much thought into the pros and cons of standard applications of SEM. The chapters on multilevel and growth modeling are an excellent feature of the book."

(Rick H. Hoyle)

*"...the book is a welcome addition to the literature on structural equation modelling. The book is one of the first to provide an overview of these recent developments. Another important merit of this book is its summary of simulation study results on several aspects of the structural equation model, including the earlier mentioned new developments. As such, it gathers a lot of useful information that otherwise would have to be obtained by persuing through numerous articles in several scientific journals."* (Jerry Welkenhuysen-Gybels *Statistical Methods in Medical Research* 2005-01-01)

### About the Author

David Kaplan received his Ph.D. in Education from UCLA in 1987. He is now a Professor of Education and (by courtesy) Psychology at the University of Delaware. His research interests are in the development and application of statistical models to problems in educational evaluation and policy analysis. His current program of research concerns the development of dynamic latent continuous and categorical variable models for studying the diffusion of educational innovations.

## **Users Review**

### **From reader reviews:**

#### **Clarence Hamm:**

Have you spare time for just a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a go walking, shopping, or went to the Mall. How about open or maybe read a book titled Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences)? Maybe it is being best activity for you. You realize beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with their opinion or you have additional opinion?

#### **William Duhon:**

Your reading sixth sense will not betray a person, why because this Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences) publication written by well-known writer who really knows well how to make book which might be understand by anyone who

else read the book. Written within good manner for you, dripping every ideas and producing skill only for eliminate your current hunger then you still skepticism Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences) as good book not merely by the cover but also through the content. This is one e-book that can break don't judge book by its deal with, so do you still needing yet another sixth sense to pick this specific!? Oh come on your reading sixth sense already said so why you have to listening to an additional sixth sense.

**John Sorrells:**

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book was rare? Why so many issue for the book? But just about any people feel that they enjoy with regard to reading. Some people likes studying, not only science book but novel and Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences) or perhaps others sources were given know-how for you. After you know how the truly great a book, you feel need to read more and more. Science publication was created for teacher or maybe students especially. Those publications are helping them to bring their knowledge. In other case, beside science reserve, any other book likes Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences) to make your spare time far more colorful. Many types of book like here.

**Micah Clark:**

Reading a book make you to get more knowledge from it. You can take knowledge and information from the book. Book is created or printed or highlighted from each source this filled update of news. In this modern era like at this point, many ways to get information are available for a person. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just seeking the Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences) when you required it?
